

Synesthesia, Team Performance, Ethnic Rhythms, and You

Do your teams have space to
Breathe?

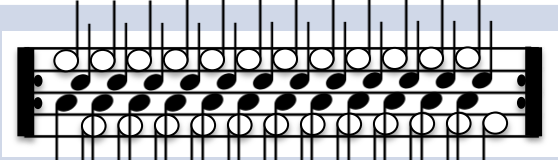

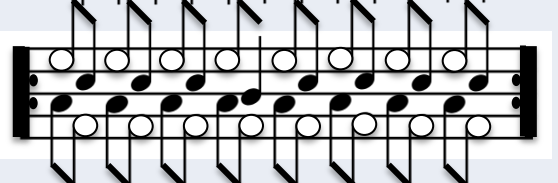

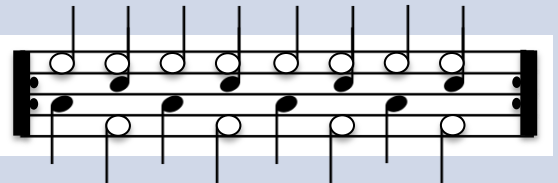

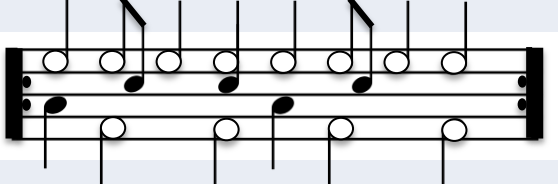

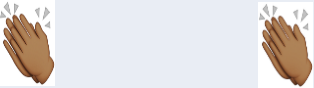

Synesthesia

- A neurological phenomenon that causes some people to mix their senses, associating color with certain letters, or sounds, or smells.
- A study published in PLOS One confirmed findings that color-odor connections are fairly stable within a culture.

Together...

- ... we shall initiate connections between world rhythms and team sophistication

Key

State	Looks Like	Feels Like
Chaos		
Oompah		
Rock		
Calypso		
Songo		

Our Tools

- Drum set
- Your handout (and something to write with)
- Portrayals of rhythms from the world
- Your participation (counting and clapping)
 - We shall rehearse this
